COURSE ASSESSMENT PARAMETERS

Introducing GRI (Global Reporting Initiative)

The Global Reporting Initiative is the world's most widely used sustainability reporting framework.

It provides standardized guidelines that help organizations:

- Identify and prioritize material ESG issues
- Measure and disclose impacts consistently
- Communicate performance transparently
- Benchmark against global best practice

The GRI Standards are created by the Global Sustainability Standards Board and used by organizations across sectors and regions worldwide to improve accountability, decision-making, and sustainability performance.

The GRI Certification Training Program equips professionals and organizations to:

- Understand ESG and sustainability reporting principles
- Apply GRI Standards in real organizational contexts
- Collect, analyze, and manage sustainability data
- Develop credible and structured sustainability reports
- Strengthen internal ESG governance and systems

GRI Professional Certification is valid for one year from the date of issuance. To maintain the "GRI Certified Sustainability Professional" designation, holders must complete a minimum of 4 Continuing Education Units (CEUs) through the GRI Academy before their certification expires
